National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, How to Complete the National Register of Historic Places Registration Form. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).

1. Name of Property

historic name Case Study House #3
other names/site number

2. Location

street & number 13187 Chalon Road
not for publication
city or town Los Angeles
state California code CA county Los Angeles code 037 zip code 90049

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,
I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.
In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

___ national ___ statewide ___ local

Signature of certifying official/Title Date

State or Federal agency/bureau or Tribal Government

In my opinion, the property meets does not meet the National Register criteria.

Signature of commenting official Date

Title State or Federal agency/bureau or Tribal Government

4. National Park Service Certification

I hereby certify that this property is:

___ entered in the National Register ___ determined eligible for the National Register
___ determined not eligible for the National Register ___ removed from the National Register
___ other (explain:) ________________________________

Signature of the Keeper Date of Action

The Case Study House Program: 1945-1966

Number of contributing resources previously listed in the National Register: 0
Narrative Description

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a summary paragraph that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

Summary Paragraph

Although located on a different site than originally conceived, the actual built house constructed in Mandeville Canyon of Los Angeles is very similar to the published plans. The house focuses on issues of space, flexibility, and low cost. Instead of a living room, the house incorporates a “living garden” – fully enclosed garden area intended to be the center of the family’s social life. Other features include an indoor workroom, extensive glazing, carport, and minimal built-in furniture (to allow the owners more flexibility in decorating). The architects specified a color scheme based on local native flora surrounding the site. The property exhibits a high level of integrity.

Narrative Description

The modest, flat-roofed, one-story residence, whose dominant design feature is a central, glass enclosed "living garden," is located on one-third of a two-acre site. The home's 1,800 square feet comprise six rooms: living/dining, garden room/enclosed patio, kitchen/workroom, 3 bedrooms and 2 baths. The dwelling is of wood frame construction and sheathed in aluminum siding (which is original). From the street, the house is mostly obscured by thick landscaping with only the double-car garage fully visible. A narrow path leads to the main entrance from the driveway.

Low-cost building materials were utilized in order to make the house affordable for a young family. The house is set on a concrete slab with wire mesh over a four-inch gravel fill. Exterior aluminum siding is applied vertically and painted light gray-green with the overhangs in brown. Steel sash was used for the large window openings that appear on all sides of the house (all bedrooms, as well as the living/dining area, feature glass sliding doors to private outdoor patio spaces). Ceiling height is approximately eleven feet. Two forced air heating units serve the living, dining, and garden rooms, with a separate unit used for the bedroom.

The house makes use of an H-shaped plan to separate living from sleeping areas. The two "legs" of the H are the living/dining/kitchen area and the sleeping/bedroom area respectively. Connecting these two "legs," as a horizontal bar of the H, is a central glass-walled porch with louvered skylight, intended as the heart of family activity; in fact this space is a combined entrance, garden room, indoor patio and children's recreation room. This enclosed porch effectively divides the home's working/living area from the quiet sleeping area. Its floors are terra cotta. Large dual glass doors slide open to create a protected half-outdoor area meant to remain open all year round.

The kitchen is combined with an adjacent utility workroom located on the "back" of the house, which is the section of the home adjacent to Chalon Road. In the architect's sketches, a man and a woman both perform household chores together in this space, a precursor to the breakdown of gender-driven homemaking roles that would gain broad based acceptance in mainstream American culture thirty to forty years hence.

Two small bedrooms and one master bedroom complete the house. Each bedroom has a private outdoor entrance; the two small bedrooms share a communal enclosed garden that faces Chalon Road and is (now) protected by a thick wall of hedges. The master bedroom has its own dressing and
bathing area with double lavatory and glass enclosed tub/shower. The children's rooms face away from the canyon.

The color scheme for the home's interior design (specified by the architects) was derived from the natural scrub and native growth of the canyon hill behind the house. Shades of gray-green were employed in the living room ceiling, draperies and carpet. The effect was to effectively bring indoors the outdoor color elements of the natural environment, a unique concern and characteristic of California mid-century modern architecture.

Case Study House #3 has experienced few alterations such that it exhibits a high level of integrity of design, materials, and workmanship. Situated in Mandeville Canyon, its integrity of setting and location are high. Its original use as a single-family dwelling indicates integrity of association, and its overall integrity of feeling is strong.
8. Statement of Significance

Applicable National Register Criteria
(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- [x] A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- [ ] B Property is associated with the lives of persons significant in our past.
- [x] C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- [ ] D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations
(Mark "x" in all the boxes that apply.)

Property is:

- [ ] A Owned by a religious institution or used for religious purposes.
- [ ] B Removed from its original location.
- [ ] C A birthplace or grave.
- [ ] D A cemetery.
- [ ] E A reconstructed building, object, or structure.
- [ ] F A commemorative property.
- [ ] G Less than 50 years old or achieving significance within the past 50 years.

Period of Significance (justification)
1949. Date of construction.

Criteria Considerations (explanation, if necessary)
N/A
Case Study House (CSH) #3 meets the criteria established in the Registration Requirements outlined in the MPS cover document. The property appears to be relatively unmodified as viewed from the public right-of-way. As a result, the house continues to “maintain enough physical integrity to be readily identifiable as a contributor to the program.” As relates to eligibility, the property meets Criterion A as one of the single family residences constructed under the auspices of the Case Study House Program: 1945-1966, as published in Arts & Architecture magazine. Under Criterion C, CSH #3 embodies the distinctive characteristics of residential architecture associated with the Modern Movement in California, and the Case Study House program in particular. In addition, CSH #3 was designed by master architects William Wilson Wurster and Theodore Bernardi. Therefore, it is eligible to qualify for listing under Criteria A and C at the local level of significance.

Narrative Statement of Significance

Case Study House (CSH) #3 was designed in 1945 and completed in 1949 by San Francisco Bay-area architects William Wilson Wurster and Theodore Bernardi. (Bernardi was a Czech-born U.C. Berkeley educated architect; William W. Wurster was at the time dean of the School of Architecture and Planning at the Massachusetts Institute of Technology.) Case Study House #3 is a vital component of the residences comprising the Case Study House program. The importance of the house, its significance within the program, and the work of its primary architect are thoroughly discussed within the historic context argument presented in the Multiple Property submission cover document. That historic context being “Experimental Modern residential architecture of the Case Study House Program in California: 1945-1966.” The house is an important example of the property type: "Single family residences of the Case Study House Program," and the "wood-frame dwellings" subtype. The property meets National Register Criterion A for its association with experimental modern housing in the postwar years under the auspices of John Entenza’s Arts & Architecture magazine.

The design for CSH #3 was intended for a site in the La Canada section of Los Angeles but was implemented in Mandeville Canyon, a former botanical garden in West Los Angeles that stretches northward into the hills from Sunset Boulevard as Sunset twists and turns toward its "terminus" at the Pacific Ocean. The canyon provides not only a private and peaceful setting for the house, but inspired an organic interior color scheme that was specifically indicated by the architects. The plan of the home reflects the burgeoning lifestyle of a typical post-World War II American nuclear family of two adults and two children. It also reflects a specific place – southern California – where the year-round moderate climate enables an easy transition between indoors and outdoors.

This low-cost, modest dwelling for a nuclear family is an early example of the design innovations that would be more fully explored in subsequent Case Study houses. In particular, the extensive use of glass in creating an indoor-outdoor porch and the inclusion of numerous patio areas that extend bedrooms to the outside is characteristic of what would soon appear in the 1950s and 1960s. As a result, the property meets National Register Criterion C because it embodies the distinctive characteristics of residential architecture associated with the Case Study House program and is the work of a master architect.
